Battery life:	Up to 3 hours
Surface temperature:	Approx. 40°C (104°F)
Size of main body:	90X40X8 (mm)
Base machine mass:	48g

## How to Use

### CHARGE THE WARMER

1. Charge the warmer with the USB cable from computer or USB socket AC/Car adapter (not included), the charging LED will turn red.
2. When the charging LED changes to green, it means the charging is finished.

### OPERATING THE HAND WARMER

1. Press the ON/OFF button. The green LED will illuminate green. After a while, the warming LED will be off.
2. This means the temperature reaches 40°C (104°F) and stays at this temperature. When the warming LED is on green again, it means the warmer's temperature is below 40°C (104°F) and starts warming up to reach 40°C (104°F) again.

### REMARK

1. When the warmer is in low power, the warming LED will turn red to remind you that it needs to be recharged.
2. When you would like to turn the hand warmer off, press the ON/OFF button again.

### CAUTION

1. Please charge the warmer completely before using it for the first time.
2. Don't drop, disassemble or attempt to repair the warmer by yourself.
3. Avoid exposure to water or high humidity
4. Don't expose the warmer to any heat source above 50°C (122°F)
5. Never attempt to use the hand warmer for purposes other than warming your hands.
